

Scaler Career Transition Assessment Report | 2024

Co-founders' Note

The last two years have been challenging worldwide; and while the overall sentiment might be cautious, we see technology influencing and entering sectors that traditionally have kept away from it. With Data Science, Machine Learning, and AI taking the centre stage, we will see a lot of unique opportunities for those well-versed in the software-tech ecosystem. Our assessment report highlights this very fact.

While the usual names of the tech industry continue to recruit, many new-age start-ups and traditional companies have forayed into the space. Technology professionals continue to be in demand and command competitive pay packages and hikes if they have a suitable knowledge base and practical skill set. The results of our assessment report have motivated us to double down on our efforts, and we hope it will help our learners understand that there is a sustainable career path for those who work hard, stay consistent, and prioritise practical learning.

The Director,
Scaler,
Bellandur,
Bengaluru

Dear Sir,

Re: Assessment of Placement Data for placements of Academy and Data Science courses for Scaler

We have assessed the data related to CTC and designations as presented in the appended Placement Summary regarding the placements of learners of the Scaler Academy and Scaler Data Science courses, respectively, of Scaler.

In this context, we confirm the following:

1. The assignment was for the assessment and analysis of the placement data of Scaler.
2. For the purpose of the Assessment, we have obtained all the data, information and explanations, which to the best of our knowledge and belief, were necessary from Scaler. The analysis and assessment have been carried out based on the same.
3. The primary data sourcing methodology from the learners was either 1:1 telephonic calls by Scaler or from the offer letters (wherever available) verified by B2K Analytics.
4. The appended placement summary has been prepared based on the available data of the 2223 Scaler learners (1978 Scaler Academy and 245 Academy DSML learners).
5. We have, on a random sample basis, verified that the learners in question are indeed bonafide students of the said courses at Scaler.
6. Considering that sharing sensitive information such as Employment, remuneration, etc. are completely at the discretion of individual learners, data availability has been a challenge. This is due to the employment agreements and confidentiality clauses of employers of Scaler Learners' which restrict sharing of such information.

P: +91 80 4040 9950 | E: info@b2kanalytics.com | www.b2kanalytics.com

7. The analysis has been done on a sample basis for learners whose placement information was available. The followed methodology for the analysis of the data is an assessment and not an audit.
8. Due to employee and employer agreements and confidentiality terms, B2K Analytics (B2K) has not independently sourced any information or documentation directly from the recruiters or Scaler learners.

Best Regards,
Ritaban Basu

Head – Risk & Analytics
B2K Analytics

Please note:

- The data set includes learners who have completed their mandatory modules and have completed a period of 6 months post that, as of Jan 1, 2024.
- Past results do not guarantee future placements.
- Career transition outcomes are a result of building skills. Enrolling in Scaler does not guarantee results.
- The numbers represented herein are aggregate numbers for the batch, and are in no way a guarantee of any future salary. Salaries are a function of skills, background, and market conditions.
- For the analysis, we have considered learners who meet Scaler's adherence criteria. **"Adherence Criteria"** means learners who have 50% attendance, or have solved 50% of the problems during the duration of the course, or are either placed.

Placement Summary:

Please Note:

Any Data point that has the prefix as:

Pre-Scaler: means before taking Academy/DSML course at Scaler.

Post-Scaler: means after taking Academy/DSML course at Scaler.

Learner Testimonials

SCALER
ACADEMY

Krishna Chaitanya
Walmart ✨

"I used to be very unfamiliar with coding fundamentals back in my college. So, when I decided to build on my coding skills and CS fundamentals, Scaler was my guiding light. My experience with them has taught me consistency, discipline, and adaptation, which are crucial characteristics that will always help one to succeed in the long run. For someone of my background to score offers from tech giants like Walmart speaks for itself!"

Bhaskar Shaw
Walmart ✨

"My jump to IT wouldn't have been half as smooth had it not been for excellent lessons from Kshitij Mishra and Rahul Yadav, or the outstanding mentorship from Nirav Akbari and Rishika Agarwal. Consistently practising problems every single day for 200+ days definitely paid-off in the end, and I have Scaler to thank for supporting me in every way possible. They left no stone unturned, be it a fantastic curriculum, personalised mentorship or ample placement opportunities."

Ankit Pangasa
Google

"Working at Google is a dream for all techies, and Scaler helped me realise this dream. Their course structure is impeccable and has helped me widen my knowledge horizon beyond the basics. They have truly established that knowledge is not limited to the four walls of a classroom, and I am grateful for all that I have learned!"

"I truly cherish my journey to Zetwerk, and I could not have accomplished it without Scaler's help. Their dedication towards each student is unparalleled, and the curriculum is industry standard, which helps one prepare for real-life challenges in the best way possible. Looking back at all that struggle and months of upskilling, I can confidently say that they are one of the best at what they do!"

Abinay Bingumalla
ORACLE

"I initially joined Scaler to brush up on my fundamentals but got the whole grand package instead. And it was easily the best decision I could have made for myself! I got a much-needed skill boost and developed a focused and disciplined mindset that helped me pave my way towards companies like Microsoft and Oracle."

Employer Testimonials

SCALER
ACADEMY

**Rajasekhar
Khandrika**

"My team and I enjoy interviewing candidates from Scaler because of the skills they possess and also the approach taken by Scaler towards the training process itself.

At XpressBees we are looking at engineers who are very strong with Data Structure, Algorithms, Cloud Computing, and also the concepts of Scaling. What I have observed is that Scaler Engineers have been molded by the training program to meet our requirements exactly."

**Himanshu
Kochar**

"Scaler Academy's training program has been instrumental in bridging our technical skills gap. Their candidates have seamlessly integrated into our team, bringing in a fresh perspective and expertise that has significantly boosted our productivity. We highly recommend Scaler Academy for their top-notch training and quality talent pool."

Sindhuja A.
onmobile

"Scaler is by far one of the most able, professional organisations and my experience with them was very much a positive one. The speed and passion with which the team works is commendable while specialising in sourcing and talent-hunting. They also value the customer's relationship and have supported team Onmobile with the most difficult roles with minimal turn-around time. The bottom line is that they make sourcing and talent-hunting easier and help in getting to the right candidates faster. A big shout out to team Scaler and looking forward to many more collaborations."

Learner Testimonials

SCALER DATA SCIENCE

Vivek Prakash

"Scaler is one of the best platform I have come across. I did enough research prior to investing in Scaler. If you use it properly, it is the best platform. They are doing a fantastic job & the instructors are superb. They keep teaching us and clearing doubts beyond midnight. I'm happy to see the dedication of the entire team."

Avijit Swain

"It just feels like yesterday that I joined Scaler's Data Science and Machine Learning Program. I do not even remember how the past few months just flew by. The last 1 year at Scaler has literally altered the course of my life. From being completely directionless and hopeless, to regaining my confidence, this has been an unbelievable turnaround for me."

Mandar Manohar Chavan

"To upskill and prepare for a career in data science, I joined Scaler. The curriculum is amazing and the assignments help you build your problem-solving ability step-by-step! In the initial days of my course, I was balancing my Master's, work and also Scaler curriculum. It was quite hard, but with time, I prepared a schedule for myself."

TATA MOTORS

"I was already impressed with the first Masterclass taken by Mudit Goel. But when I began the DSML course, it was even better with my instructor Bipin Kalra who taught me to code from the scratch and help me fight against my coding phobia. In fact, I had no option but to fight the phobia.

Learning about DSML every day is making me realise how broad its scope is. And especially with the emerging trends, this field is only bound to grow further."

Sunshodan Makkar
@amber

"I'd like to thank the Scaler team- from great instructors like Mohit Uniyal to Scaler teaching assistants who made my transition into the DSML field so much smoother. While Data Analytics wasn't my initial area of interest, attending classes and immersing myself in learning allowed me to discover a genuine interest and passion for it."

Mayank Khandelwal

"The best way to learn something is by diving straight into the deep-end and broadening your horizons. For that, I would like to specifically thank Srikanth Varma Chekuri. Having an in-depth understanding of the various projects we can target - as a fresher or an experienced professional - was super exciting to learn about."
